

Novel Insights to Reactions of Cyclophosphazenes and Amines

8th edition of Nligands conference took place in Cassis, France

- ✓ 5 plenary lectures
- ✓ 9 keynote and 7 invited lectures
- ✓ 17 flash talks and 42 posters

The talks were focused on different roles of nitrogen ligands and their complexes in:

- catalysis
- imaging and therapeutic agents
- chemical sensing
- energy storage etc.

The conference was a great opportunity to present our research on cyclophosphazenes and to network with other scientists.
