Supramolecular LUminescent Chemosensors for Environmental Security

Functional Styrene/4-Vinylpyridine Copolymers as Coordinating Host Matrices for Luminescent Pt(II) Chemosensors: Scientific Consultancy and Translation towards Industrial Feasibility

Different synthesis strategies will provide S-VP copolymers with different microstructures:

→ Impact on Pt-Pt-interaction and luminescence?

Prof Dr Sebastian Koltzenburg

Home Group: University of Heidelberg, D-69120 Heidelberg, Germany

Host Group: Prof Dr Andrea Pinto y Martinez, Inorganic Chemistry Section, Faculty of Chemistry, University of Barcelona, Spain

Period: 25.10.2026 to 27.10.2026

cost EUROPEAN COOPERATION IN SCIENCE & TECHNOLOGY
